Take on New Challenges as a Senior Project Manager

You're good with people, highly organized, meet deadlines and budgets—now you just need the know-how to take on more complex projects. Learn what it takes to succeed as a senior project manager.

Advance Your Skills, Advance Your Career

As an experienced project manager, you know how to keep it together while managing multiple, fast-moving parts. But now that you're ready to take your career to the next level, it's time to learn the essentials of senior project management:

- Enterprise-wide project management
- Effective Project Organization and Project Management Office (PMO)
- Assessing risks in multiple and complex projects
- Advanced cost and scheduling control techniques
- Leading multi-functional teams

Reach beyond the basics with the advanced technical skills required to run a complex portfolio of projects effectively. Improve your proficiency with the Senior Project Manager Certificate Program, and you'll learn project leadership, delegation and team empowerment skills. This new knowledge will help you to work side by side with other skilled project managers on the one hand and to represent your company vis-à-vis clients on the other.

Influence the Entire Business

From IT project management to overseeing product development life cycles, project managers are in demand and are a vital resource in any growing organization. Your company needs leaders to make an impression in your industry and gain market share. A certificate from the University of Washington can help you become that leader.

With this program, you'll not only get the education that will advance your skills and your career. You'll also network with others in your profession and with the expert instructors who teach the courses from the perspective of real-life experience.

Fast Facts:

- Project management is a growing field. In 2006 alone, membership in the Project Management Institute (PMI)—the world's largest nonprofit association serving project management—increased by nearly 50 percent.
- Project managers in the information technology industry earn between \$63,000-\$110,000 per year; according to a survey on www.computerjobs.com.
